

## **Egg Shells (for Human Consumption)**

Egg shells that are not heat treated as noted below are not eligible for import into Korea at this time (Korea requires the shells to meet the same requirements as table eggs, and these requirements cannot be certified by the USDA.)

Heat-treated egg shells that are imported into Korea for human consumption must be certified by APHIS with the following statement in the additional declaration area of the VS Form 16-4.

Products have been subjected to a pasteurization treatment of [insert the appropriate: 55° C for a minimum of 15 min; or, 60° C for a minimum of 5 minutes; or, 64° C for a minimum of 4.5 minute] in such a manner as to prevent contamination by communicable animal disease pathogens and their transmission.
